

ALYCON CAPITAL

REVISION2

Our replies are in blue colour

Client Comments: Hi, looking very nice! :-)

I have just one page to draw your attention to please, that being the Current Investments overview page. The headings are running out of the boxes and the boxes are generally too narrow. Perhaps the image can slot on top of the text boxes in order to allow a little more room?

Other than that I will advise once we get the other images through from the client.

Many thanks for your efforts.

I have asked for the images and also a couple of initial blog posts if possible so that we can add them into the news page.

Can the news page (blog) be set up any further while we wait for those at all?

Hi.

Here is the other dropbox link you need:

<https://www.dropbox.com/sh/rq6gkirb5af8dw4/AACwTEm-ouBoRRhxeARwOhoMa?dl=0>

Sorry that's my fault, I hadn't noticed there were two different folders sent by the designers. Hopefully this contains what you need. In case anything isn't clear please shout.

Also we have asked the client to prepare a couple of blog posts, but we can still deliver the site beforehand as long as the blog itself is ready.

Many thanks for your help

Our Response:

We have set up the blog/news page. We still are not able to find images in both dropbox. Let us know if we can move the site to your server and wind up the project. Let us know if you have any comments over the site.

Client's message:

On my system the blog page looks like the below. However the design should be like this link:

https://www.dropbox.com/home/Alcyon%20Website_15.09.2015?preview=07_News+b.jpg

Some of the images are in the dropbox folders as below.

High Performance Doors Logo

https://www.dropbox.com/sh/ofnd2wmiotra1at/AABGJjI2Npq0kurc6ud8rd2a?dl=0&preview=logo_hpdoors-17.png

Barclay & Mathieson limited logo and inline content

https://www.dropbox.com/sh/ofnd2wmiotra1at/AABGJjI2Npq0kurc6ud8rd2a?dl=0&preview=logo_bm+steel-16.png

https://www.dropbox.com/home/Matt%20Dickson_ibiz%20Consult/images?preview=04_case+study+other+pictures.jpg

The others I have flagged up for immediate attention.

The site can be moved to my server once fully complete and ready to show the client.

Sorry about the delay with these last few images, they shouldn't take long to retrieve.

Here are the other images we have been waiting on.

High performance doors

. banner image

Please let me know once ready and suggest the best way to upload to demo so I can show the site to the client to finalise the project.

I don't mind whether we use our demo link or yours, as long as there is no reference to Credofy please, if you wouldn't mind.

We are scheduled to show the site to the client tomorrow or wednesday for approval, any final tweaks, and subsequent settlement.

Many thanks for your help

Our message:

Hello Matt, those images have been added

We can upload it to your server by today itself. And can do any other tweaks that are needed later on your server.

Let me know when you can transfer remaining funds so we can start the transferring process. We strongly believe in making good business relations, so not to worry about the final work

Client's message:

Thanks for sorting that out for me. It's unfortunate about the delay caused by the server redirect.

I have reviewed the site and noticed three things that are missing:

- 1) the image on the Barclay and Matheson page (see attached)
- 2) fwd/back navigation on the current investments page
- 3) prev/next navigation on the blog posts page

Please can you see to these for me asap? I will then show the client and flag up any other points if needed. Many thank

Our message:

Have placed the image on Barclay and Mathieson page. About the previous/ next options, the theme supports it in different way, see attached screenshot. Same for the news prev/next.

Also have deleted the extra plugins.

Client's message:

I now have the feedback in from the client and design team, so hopefully we can apply the last few tweaks to the Acylon website in order to wrap it up 100%... :-)

Please see the below and confirm it's all clear and okay and how soon we can have the updates all ready.

We have been working on the feedback for Alcyon website.

<https://www.dropbox.com/s/h45fo7sz9ftf6ty/feedback.pdf?dl=0>

<https://www.dropbox.com/sh/2d87722gtfusz0j/AADhABGSgnT8fyddrY4YAfEHa?dl=0>

We are pretty happy with the work done here: resolution, functioning, everything works perfect. Again, really happy to work with you on this.

On the feedback attached we have focused on details that need to be changed. This is because small things will make the difference and we are a little perfectionist as you will noticed --

On pages 'Home' 'About Alcyon' and 'Criteria' there are several things to change but on the rest everything is almost done.

These details are:

- changes on things that we made (which come from our 'mistakes')
- changes on things that have been implemented slightly different from design

Changes on things we made. In general all the images of headers look washed so we have uploaded new ones with a bolder green-blue effect on Dropbox. We have also changed sizes and weights on text to unify the overall contents hierarchy.

Changes on things implemented different from design. Mainly distances between things that need to be adjusted and some other details.

There are **three things that we would like to see with you in terms of functioning** that can make the homepage a bit more appealing. It would be great to have **your thoughts here** on each of the following:

- Transition effects on hero image. We are pretty happy with the effect fade in/out. However, we are not 100% sure if it is dynamic enough. We were thinking if it is possible to try with this slide effect instead <http://www.ignant.de> As long as we are not 100% sure about it, we would like to hear your thoughts, which effect you think is more suitable?
- Slideshow at bottom of homepage. We have been thinking about this and we would like to see if it is possible to get back to the idea of having sliding images along with scrolling news here. This is because the water theme is too repetitive and the fact of having some of the work displayed here will make home page more interesting. Is it possible to do it?
- Regarding to the parallax effect we discussed about at the beginning. Is it possible to apply it only to homepage? So hero slideshow stays static and when user scrolls down information goes above image as in <http://www.ignant.de>.

Our message:

All changes are done

Client's message:

Just to let you know that we have now (finally) set the site up this evening on it's proper domain, ready for launch:

<http://www.alcyoncapital.co.uk/>

I just wanted to thank you again for all your hard work on this project.

I think the attention to details is what makes the site great in the end.

Thanks again and I look forward to working with you guys on our next project.

SITE IS LIVE
