Scope Technology Group - Total IoT Convergence

Scope Technology Group is a collection of specialist Systems & Design businesses, spanning the last 20 years. Scope Technology Group provides a unique convergence of critical IoT services through one channel. Data Cabling, Connected Lighting Control, Power Distribution, AV, Fire, Security and Energy are all critical to the adaption of IoT technology, and is enhancing peoples quality of life and improving commercial competitiveness. We are the only Company in Ireland that offer such a unique blend of services.

Scope Technology Group are setting goals to maximise the impact that IoT can provide for a better world. IoT and Big Data are transforming Green Buildings, into Living Buildings. At Scope Technology Group, we understand the relationship patterns within data, generated from multiple sources that identify operational efficiencies, reduce energy consumption, improve occupant experiences, and optimising financial performance with services that improve buildings and their efficiency.

Business Fire Alarm Installation, Maintenance, Monitoring, Design and Commission

Logic Fire & Security commercial fire alarm systems provide the earliest possible warning of a developing emergency situation. We offer 24-hour fire alarm monitoring.

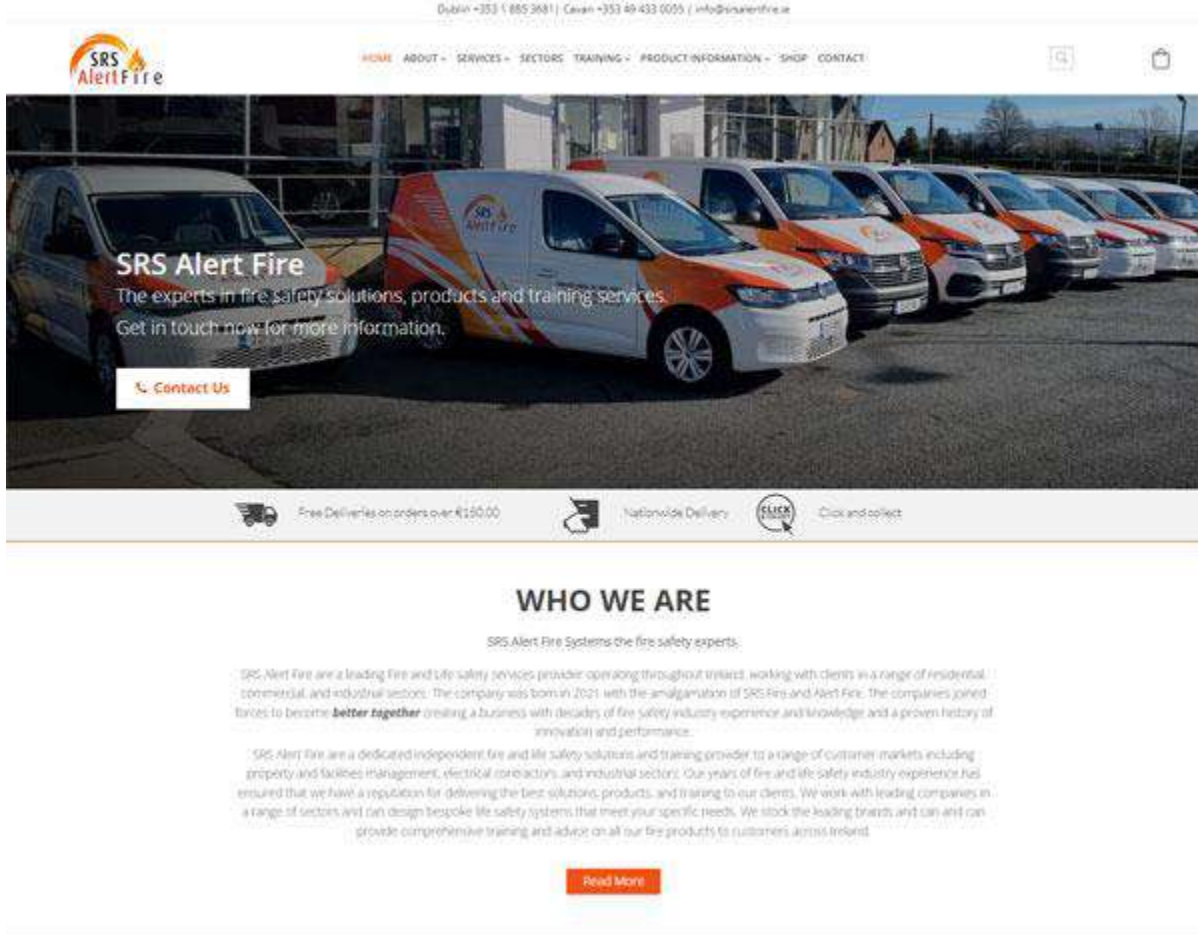

Fire can devastate your business by putting lives and livelihoods at risk. Early incident raised through early warning systems can greatly reduce casualties in the event of an emergency by allowing the safe evacuation of people from your premises.

Our systems save lives. They greatly reduce the damage and disruption fire and smoke can cause to your business premises. They also help you meet your legislative responsibilities.

Logic Fire & Security design, supply, install and commission commercial Fire Alarm systems. We also install and maintain all brands of fire alarms. All of our Fire engineers are trained to install and maintain your fire alarm according to the latest standards BS58-2017.
